VELOOP REWARDS - Data Analyst Internship, Task 01

Step 1: Source & Verification Register (Days 1-2)

Data authenticity: Any dataset used in this project is SIMULATED - CREATED FOR ANALYTICAL TESTING. Nothing in this document describes actual VELOOP users, earnings, withdrawals, revenue or performance.

Status definitions. Confirmed = verified from an official/internal source actually seen. **Proposed** = recommended by this analysis or the brief; not known to exist in VELOOP. **To Be Verified** = unknown; needs engineering/product confirmation.

Key finding: A public search for 'VELOOP Rewards app' returned no official VELOOP Rewards page. Results were unrelated products with similar names (a Colombian mobility membership app, Velocia, and a nicotine-pouch rewards programme). They were not used as evidence. Official documentation has been requested (S008, S009, A018).

1. Source Register

Source ID	Information	Source	Source Type	Date Checked	Status	Notes / Limitation
S001	Task brief states VELOOP is a real product under development; supplied data is fictional/simulated	Task 01 brief (Data_Analyst_01.PDF), Sec. 2	Internal	2026-10-08	Confirmed	Defines how all data in this project must be labelled.
S002	Brief states VELOOP Rewards currently lacks the production data volume needed for conventional performance analysis	Task 01 brief, Sec. 35	Internal	2026-10-08	Confirmed	Statement from the brief itself, not independently checked.
S003	Brief lists possible product areas (accounts, VEs, XP, Gems, Tokens, Spins, daily rewards, streaks, tasks, missions, badges, levels, referrals, wallet, exchange, withdrawals, support)	Task 01 brief, Sec. 5	Internal	2026-10-08	Proposed	Brief says 'may include' and warns not to assume every feature is implemented. Treated as candidate scope only.
S004	Example product areas for mapping: Registration, Login, Watch Ads, Daily Rewards, Tap & Earn, Mining, Spin, Missions, Referrals, Wallet, Withdrawals, Help Center	Task 01 brief, Sec. 7 (A1)	Internal	2026-10-08	Proposed	Examples only. Implementation status of each is unverified.
S005	Minimum event list (user_registered ... withdrawal_reversed) and withdrawal/referral/task lifecycles	Task 01 brief, Sec. 9-12	Internal	2026-10-08	Proposed	These are proposed analytics events, not events known to exist in VELOOP.
S006	Simulated dataset spec: 7 sheets + Messy_Data; ~1,000 users, 6,000 task rows, 5,000 rewards, 3,500 wallet, 1,200 withdrawals, 900 referrals, 12,000 feature events, 500+ messy rows	Task 01 brief, Sec. 16 & 28	Simulated	2026-10-08	Proposed	Expected structure per brief. Actual file not yet opened; real counts may differ.
S007	Dataset shared via Google Drive folder link	Task 01 brief, header	Internal	2026-10-08	To Be Verified	Link not yet opened/inspected. Dataset contents and column names unknown until accessed.
S008	Public web search for 'VELOOP Rewards app' returned no official VELOOP Rewards page. Results were unrelated products (Veloop mobility membership in Colombia on Apple App Store, Velocia mobility rewards, VELO nicotine pouch rewards)	Web search, 2026-10-08	Official	2026-10-08	To Be Verified	Name similarity only. These must NOT be used as evidence about VELOOP Rewards. Ask mentor/product team for official docs or app link.

Source ID	Information	Source	Source Type	Date Checked	Status	Notes / Limitation
S009	No official VELOOP Rewards documentation (app, website, help center, whitepaper) has been supplied yet	Task 01 package	Internal	2026-10-08	To Be Verified	Request product documentation or a product walkthrough from the VELOOP team.

2. Assumption & Verification Register

ID	Unknown	Why It Matters	Source Checked	Risk	Verification Owner	Status
A001	Does the backend currently emit task completion events?	Required for all task analytics	Task brief	High	Engineering	To Be Verified
A002	Which reward units actually exist today (VE, XP, Gems, Tokens, Spins) and do they convert into each other?	Defines reward_unit values, wallet model and exchange analytics	Task brief	Critical	Product / Engineering	To Be Verified
A003	Is a stable user_id issued at registration and kept across devices and login methods?	Needed for any cross-event or retention analysis	Task brief	Critical	Engineering	To Be Verified
A004	Is a session identifier currently stored?	Needed for session-level analysis; proposed only until confirmed	Task brief	Medium	Engineering	To Be Verified
A005	Does every wallet transaction have a unique transaction ID, and is writing it idempotent?	Without it, wallet deduplication cannot be guaranteed	Task brief	Critical	Engineering	To Be Verified
A006	Which withdrawal methods exist and which statuses does a withdrawal pass through?	Defines withdrawal lifecycle, method distribution KPI	Task brief	High	Product / Operations	To Be Verified
A007	Are withdrawals reviewed manually, automatically, or both?	Affects processing-time KPIs and reason categories	Task brief	High	Operations	To Be Verified
A008	Which earning features are live vs planned (Watch Ads, Tap & Earn, Mining, Spin, Missions, Daily Rewards)?	Prevents designing events for features that do not exist	Task brief	High	Product	To Be Verified
A009	Which third-party providers (ads, surveys, offers, games) are used and what callbacks/postbacks do they return?	External systems affect data completeness and validation	Task brief	High	Engineering	To Be Verified
A010	What exactly counts as an 'activated' referred user?	Needed to separate registration from referral conversion	Task brief	High	Product	To Be Verified
A011	Where is data stored today (production DB, analytics tool, none)?	Drives pipeline design and raw-layer choice	Task brief	High	Engineering	To Be Verified
A012	What timestamp format and timezone does the system use?	Needed for daily/active-user KPIs and timestamp validation	Task brief	High	Engineering	To Be Verified
A013	Can rewards be reversed or corrected in the current system, and how is it recorded?	Needed for reward_reversed / corrected events	Task brief	Medium	Engineering / Operations	To Be Verified
A014	How is registration source captured (referral code, UTM, store, organic)?	Needed for acquisition analysis	Task brief	Medium	Engineering / Marketing	To Be Verified
A015	Does a support ticket or Help Center system exist, and does it record issue categories?	Needed for support/content KPIs	Task brief	Low	Support / Product	To Be Verified

ID	Unknown	Why It Matters	Source Checked	Risk	Verification Owner	Status
A016	Which user geographies and privacy rules apply (consent, retention)?	Governance and privacy proposal depends on it	Task brief	Medium	Legal / Product	To Be Verified
A017	What are the real sheet names, columns and row counts of the simulated dataset in the Drive folder?	Profiling and KPI tests depend on actual structure	Task brief	Medium	Data Analyst (me)	To Be Verified
A018	Where is the official VELOOP product documentation?	All 'Confirmed' product facts need an official source	Web search (no official result)	High	Mentor / Product team	To Be Verified

3. Product Area Status

Product Area	Source ID	Implementation Status	Analytics Scope Status	Notes
Registration	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Login	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Onboarding	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
User Account / Profile	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Tasks	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Watch Ads	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Daily Rewards	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Streaks	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Tap & Earn	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Mining	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Spin	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Missions	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Badges	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Levels	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
XP	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
VEs	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Gems	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Tokens	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Referrals	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Wallet	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Exchange	S003	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Withdrawals	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
Help Center / Support	S004	To Be Verified	Proposed	Implementation not verified. Included as candidate analytics scope only.
