VELOOP REWARDS - Assumption and Verification Register

Data Analyst Internship, Task 01 | Work Package S

Authenticity notice: This register exists so that nothing unknown is guessed. Nothing about VELOOP's product is Confirmed yet (two items about the supplied file are), and no simulated or real VELOOP statistics appear here.

1. Summary

- **50 unknowns recorded**: A001 to A018 from the first review and A019 to A050 raised by later work packages and the dataset work. 45 are To Be Verified, 3 are Proposed (a proposal awaits a decision), 2 are Confirmed (A017 and A043, from the supplied file).
- **5 are Critical risk** and 19 High. Critical ones: A002, A003, A005, A023, A029.
- **Every item has an owner and the evidence needed to close it**, plus the gaps it feeds and the documents that cite it, so a change in one answer shows what it affects.
- **A046 limits the dataset work:** the supplied file holds the Users entity only, so relationship tests beyond Users, most KPI tests and 21 of the 39 quality rules could not be run.

2. Risk by status

Risk	To Be Verified	Proposed	Confirmed	Total
Critical	5	0	0	5
High	16	2	1	19
Medium	19	1	1	21
Low	5	0	0	5

3. Sources update

ID	Information	Source	Type	Checked	Status	Notes
S009	No official VELOOP Rewards documentation (app, website, help center, whitepaper) has been supplied yet	Task 01 package	Internal	2026-10-08	To Be Verified	Request product documentation or a product walkthrough from the VELOOP team.
S010	Supplied dataset file: sheets Users_1000_Clean (1,000 rows), Users_Messy_Audit (1,008 rows), Data_Dictionary (25 fields), Synthetic_Summary and README_Data_Status	Uploaded file 1791734466513_VELoop_Rewards_Data_01.xlsx	Simulated	2026-10-11	Confirmed	Contents confirmed by inspection. The file states it is simulated and not actual VELOOP data.
S011	The supplied dataset covers the Users entity only; the Task Activity, Rewards, Wallet, Withdrawals, Referrals and Feature Events sheets from the brief are not in the file	Inspection of the uploaded file	Simulated	2026-10-11	Confirmed	Limits relationship tests, KPI tests and rule tests (A046).

The full source list (S001 to S010) is in the spreadsheet. S001 to S009 are unchanged from the first register.

4. Assumption register

ID	Unknown	Why It Matters	Risk	Owner	Status	Needed By	Related Gaps	Evidence Needed to Close	Referenced In
A001	Does the backend currently emit task completion events?	Required for all task analytics	High	Engineering	To Be Verified	Pre-launch	G03, G09, RG-01	Engineering confirms with a code reference, schema or sample record	Developer Handoff, Earning and Reward, Event Tracking Plan, Implementation Backlog, Logical Data Model, Product Data Audit, Readiness Assessment
A002	Which reward units actually exist today (VE, XP, Gems, Tokens, Spins) and do they convert into each other?	Defines reward_unit values, wallet model and exchange analytics	Critical	Product / Engineering	To Be Verified	Pre-launch	G04, RG-07, RG-12	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Developer Handoff, Earning and Reward, Event Tracking Plan, Implementation Backlog, KPI Catalogue, Product Data Audit, Quality Framework, Readiness Assessment, Referral and Engagement, Wallet and Withdrawal
A003	Is a stable user_id issued at registration and kept across devices and login methods?	Needed for any cross-event or retention analysis	Critical	Engineering	To Be Verified	Pre-launch	G01, RG-04	Engineering confirms with a code reference, schema or sample record	Developer Handoff, Implementation Backlog, KPI Catalogue, Product Data Audit, Readiness Assessment, Referral and Engagement, User Analytics
A004	Is a session identifier currently stored?	Needed for session-level analysis; proposed only until confirmed	Medium	Engineering	To Be Verified	Before the related dashboard	G08	Engineering confirms with a code reference, schema or sample record	Developer Handoff, Implementation Backlog, KPI Catalogue, Product Data Audit, User Analytics
A005	Does every wallet transaction have a unique transaction ID, and is writing it idempotent?	Without it, wallet deduplication cannot be guaranteed	Critical	Engineering	To Be Verified	Pre-launch	G02, RG-04, RG-19	Engineering confirms with a code reference, schema or sample record	Developer Handoff, Event Tracking Plan, Implementation Backlog, KPI Catalogue, Logical Data Model, Product Data Audit, Readiness Assessment
A006	Which withdrawal methods exist and which statuses does a withdrawal pass through?	Defines withdrawal lifecycle, method distribution KPI	High	Product / Operations	To Be Verified	Pre-launch	G06, RG-05, RG-07	Written decision or confirmation from the data owner, recorded in the change log; Written confirmation from Operations or Finance	Developer Handoff, Event Tracking Plan, Implementation Backlog, KPI Catalogue, Product Data Audit, Readiness Assessment, Wallet and Withdrawal
A007	Are withdrawals reviewed manually, automatically, or both?	Affects processing-time KPIs and reason categories	High	Operations	To Be Verified	Pre-launch	G06, G09, RG-05	Written confirmation from Operations or Finance	Implementation Backlog, Product Data Audit, Readiness Assessment, Wallet and Withdrawal
A008	Which earning features are live vs planned (Watch Ads, Tap & Earn, Mining, Spin, Missions, Daily Rewards)?	Prevents designing events for features that do not exist	High	Product	To Be Verified	Pre-launch	G13	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Product Data Audit

ID	Unknown	Why It Matters	Risk	Owner	Status	Needed By	Related Gaps	Evidence Needed to Close	Referenced In
A009	Which third-party providers (ads, surveys, offers, games) are used and what callbacks/postbacks do they return?	External systems affect data completeness and validation	High	Engineering	To Be Verified	Pre-launch	G10, RG-21	Engineering confirms with a code reference, schema or sample record	Earning and Reward, Implementation Backlog, Product Data Audit, Readiness Assessment, Wallet and Withdrawal
A010	What exactly counts as an 'activated' referred user?	Needed to separate registration from referral conversion	High	Product	To Be Verified	Pre-launch	G07, RG-10, RG-18	Written decision or confirmation from the data owner, recorded in the change log	Developer Handoff, Implementation Backlog, KPI Catalogue, Logical Data Model, Product Data Audit, Readiness Assessment, Referral and Engagement, User Analytics
A011	Where is data stored today (production DB, analytics tool, none)?	Drives pipeline design and raw-layer choice	High	Engineering	To Be Verified	Pre-launch	G14, RG-06, RG-20, RG-30	Engineering confirms with a code reference, schema or sample record	Developer Handoff, Event Tracking Plan, Implementation Backlog, Pipeline, Privacy and Governance, Product Data Audit, Readiness Assessment
A012	What timestamp format and timezone does the system use?	Needed for daily/active-user KPIs and timestamp validation	High	Engineering	To Be Verified	Pre-launch	G11, RG-11, RG-22	Engineering confirms with a code reference, schema or sample record	Dashboard Blueprint, Implementation Backlog, KPI Catalogue, Product Data Audit, Quality Framework, Readiness Assessment, Referral and Engagement, Simulated Data Profiling, User Analytics
A013	Can rewards be reversed or corrected in the current system, and how is it recorded?	Needed for reward_reversed / corrected events	Medium	Engineering / Operations	To Be Verified	Before the related dashboard	G05, RG-18	Engineering confirms with a code reference, schema or sample record; Written confirmation from Operations or Finance	Earning and Reward, Implementation Backlog, Product Data Audit, Readiness Assessment, Referral and Engagement
A014	How is registration source captured (referral code, UTM, store, organic)?	Needed for acquisition analysis	Medium	Engineering / Marketing	To Be Verified	Before the related dashboard	G12	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Product Data Audit
A015	Does a support ticket or Help Center system exist, and does it record issue categories?	Needed for support/content KPIs	Low	Support / Product	To Be Verified	Post-launch	G15	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, KPI Catalogue, Product Data Audit
A016	Which user geographies and privacy rules apply (consent, retention)?	Governance and privacy proposal depends on it	Medium	Legal / Product	To Be Verified	Before the related dashboard	RG-25	Written Legal guidance; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Privacy and Governance, Readiness Assessment
A017	What are the real sheet names, columns and row counts of the simulated dataset in the Drive folder?	Profiling and KPI tests depend on actual structure	Medium	Data Analyst (me)	Confirmed	Before the related dashboard	-	Checked against the dataset and documented	Implementation Backlog, Readiness Assessment
A018	Where is the official VELOOP product documentation?	All 'Confirmed' product facts need an official source	High	Mentor / Product team	To Be Verified	Pre-launch	RG-27	Written decision or confirmation from the data owner, recorded in the change log; Dataset or documentation supplied and opened	Implementation Backlog, Product Data Audit, Readiness Assessment

ID	Unknown	Why It Matters	Risk	Owner	Status	Needed By	Related Gaps	Evidence Needed to Close	Referenced In
A019	Which account statuses and onboarding steps exist in the product?	Defines account_status values, lifecycle stages and the onboarding funnel	High	Product / Engineering	To Be Verified	Pre-launch	-	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Data Quality Audit, Developer Handoff, Implementation Backlog, KPI Catalogue, Simulated Data Profiling, User Analytics
A020	Does a pending reward state exist, and does a pending reward have its own record?	Pending Rewards KPI and the reward_pending event depend on it	Medium	Engineering	To Be Verified	Pre-launch	RG-23	Engineering confirms with a code reference, schema or sample record	Earning and Reward, Implementation Backlog, KPI Catalogue, Logical Data Model, Readiness Assessment
A021	Which events exist today, and which component emits each?	Decides what is reused and what must be built	High	Engineering	To Be Verified	Pre-launch	RG-01, RG-02, RG-16, RG-29	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Readiness Assessment
A022	Which approved lists (statuses, units, methods, categories) will be used, and where do they live?	Validation rules DQ009 and DQ014 need one source of approved values	High	Product / Engineering	To Be Verified	Pre-launch	RG-07, RG-08	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Data Quality Audit, Implementation Backlog, Readiness Assessment, Simulated Data Profiling
A023	Which idempotency and retry design will events and wallet writes use?	Prevents duplicate events and duplicate wallet entries	Critical	Engineering	To Be Verified	Pre-launch	RG-19	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Readiness Assessment
A024	Which events qualify a user as 'active', and what is the activity window?	DAU, WAU, MAU, returning and inactive users depend on it	High	Product	Proposed	Stakeholder decision	RG-09	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment, Simulated Data Profiling
A025	Can a user have only one referrer, and can referrals be closed or disqualified by category?	Referral integrity rules and the closed status	Medium	Product	To Be Verified	Pre-launch	-	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog
A026	Is the withdrawal amount held at request time or debited on completion?	Changes balance and pending-queue logic	High	Product / Engineering	To Be Verified	Pre-launch	-	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog
A027	Are there withdrawal fees, limits or minimum amounts?	completed_amount versus requested_amount validation	Medium	Operations / Finance	To Be Verified	Pre-launch	-	Written confirmation from Operations or Finance	Implementation Backlog
A028	Can a user cancel a withdrawal before processing?	withdrawal_cancelled event and completion rate	Low	Product	To Be Verified	Post-launch	-	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog
A029	Is the wallet an append-only ledger, or are balances edited in place?	Decides whether balance reconciliation (DQ031) is possible	Critical	Engineering	To Be Verified	Pre-launch	RG-18	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Readiness Assessment
A030	Is there a separate redemption or exchange record in the product?	Redemption and exchange KPIs, and whether a new entity is needed	Medium	Product / Engineering	To Be Verified	Pre-launch	RG-18	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A031	Are task attempts stored today, or only completions?	Grain of Task_Activity and Task Completion Rate	High	Engineering	To Be Verified	Pre-launch	RG-06, RG-23	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Readiness Assessment
A032	Which BI option will be used?	Dashboard build and aggregated-only access	Medium	Product / Data Analyst	To Be Verified	Pre-launch	RG-17	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment

ID	Unknown	Why It Matters	Risk	Owner	Status	Needed By	Related Gaps	Evidence Needed to Close	Referenced In
A033	Can operational tables be read from a replica or export without affecting the live product?	The table extract flow (F2) depends on it	High	Engineering	To Be Verified	Pre-launch	RG-20	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Readiness Assessment
A034	Who triages the quarantine table, and how often?	Quarantined records need an owner to be resolved	Medium	Data Analyst / Product	To Be Verified	Pre-launch	RG-15	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A035	What freshness, volume, clock-tolerance and late-arrival limits apply?	Monitoring and DQ036 to DQ038 need limits	Medium	Engineering / Data Analyst	To Be Verified	Pre-launch	RG-14	Engineering confirms with a code reference, schema or sample record	Implementation Backlog, Readiness Assessment
A036	What retention period applies to each data zone?	Privacy and storage cost	Medium	Legal / Product	To Be Verified	Pre-launch	RG-25	Written Legal guidance; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A037	Who are the named data owners and stewards for each entity?	Access approvals and governance depend on named people	High	Product / Management	Proposed	Pre-launch	RG-24	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A038	What group size triggers small-group suppression in reports?	Prevents re-identification in aggregated reports	Medium	Product / Legal	To Be Verified	Post-launch	RG-26	Written Legal guidance; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A039	How often is access reviewed?	Least-privilege access drifts without review	Low	Product / Engineering	To Be Verified	Post-launch	RG-24, RG-26	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A040	How long is the overlap period, and what notice is given, for breaking changes?	Change management	Low	Product	To Be Verified	Post-launch	RG-28	Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A041	Who besides Product approves money-related KPI changes?	Governance of money KPIs	Medium	Finance / Product	To Be Verified	Post-launch	RG-28	Written decision or confirmation from the data owner, recorded in the change log; Written confirmation from Operations or Finance	Implementation Backlog, Readiness Assessment
A042	What wait times define 'abandoned' and 'tracking_failed' for tasks?	Failure categories and Provider Callback Reliability	Medium	Product / Engineering	To Be Verified	Pre-launch	RG-21	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A043	When will the supplied dataset be available in an accessible form?	Profiling, relationship tests, KPI tests and the Messy_Data audit all depend on it	High	Mentor / Product team	Confirmed	Before Work Packages J and K	RG-29	Written decision or confirmation from the data owner, recorded in the change log; Dataset or documentation supplied and opened	Implementation Backlog, Readiness Assessment
A044	Do features outside earning (Help Center, wallet view) need a generic feature_opened event?	Adoption of non-earning features	Medium	Product / Engineering	Proposed	Pre-launch	RG-03	Engineering confirms with a code reference, schema or sample record; Written decision or confirmation from the data owner, recorded in the change log	Implementation Backlog, Readiness Assessment
A045	Is country available at registration, at country level?	Geographic distribution on the User Analytics dashboard	Low	Engineering	To Be Verified	Post-launch	-	Engineering confirms with a code reference, schema or sample record	Dashboard Blueprint, Implementation Backlog

ID	Unknown	Why It Matters	Risk	Owner	Status	Needed By	Related Gaps	Evidence Needed to Close	Referenced In
A046	Will the other simulated datasets (task activity, rewards, wallet, withdrawals, referrals, feature events) be supplied?	Relationship tests beyond Users, most KPI tests and 21 of the 39 quality rules cannot run without them	High	Mentor / Product team	To Be Verified	Before the next audit	RG-13	Written decision or confirmation from the data owner, recorded in the change log; Dataset or documentation supplied and opened	Data Quality Audit, Simulated Data Profiling
A047	What do the account status values mean (Active, Inactive, Suspended, Pending Verification), and may an Active account have an unverified email?	The dataset's status clashes with the derived activity concept; the allowed combinations are unknown	Medium	Product	To Be Verified	Pre-launch	RG-31	Written decision or confirmation from the data owner, recorded in the change log	Data Quality Audit, Simulated Data Profiling
A048	Which user attributes (age, gender, state, city, consent, email verification) will actually be collected, and are they needed for analytics?	Data minimisation and consent fields; the supplied file holds more personal-looking fields than the proposed dictionary	Medium	Product / Legal	To Be Verified	Pre-launch	-	Written Legal guidance; Written decision or confirmation from the data owner, recorded in the change log	Simulated Data Profiling
A049	What reference time and timezone define days_since_registration and the 7-day and 30-day activity flags?	The supplied file does not state it; the counts only reproduce with 15 Sep 2026 00:00	Medium	Engineering / Data Analyst	To Be Verified	Pre-launch	RG-31	Engineering confirms with a code reference, schema or sample record	Simulated Data Profiling
A050	Can an account have sessions without a recorded login, or a login without sessions, and which counter is authoritative?	The supplied data contains both; session and active-day counters are unreliable until this is settled	Medium	Engineering	To Be Verified	Pre-launch	RG-31	Engineering confirms with a code reference, schema or sample record	-

5. Next steps

- Send Engineering the Critical and High items first; most close with one confirmation each.
- Ask the Product team for the decisions marked Proposed (for example the definition of 'active').
- Provide the remaining datasets (A046) so profiling, the KPI test and the audit can be re-run.
